All other goods and wares which shall be caried out of this Realme by way of merchandise and be not mentioned among the rates for the subsidies or poundage outwards (our pleasure is) shall be rated to pay custome and subsidie or poundage outwards, according vnto the values and prices of the same goods mentioned in this book among the rates for the subsidie or poundage inwards.

And if there shall happen to be brought in or carried foorth in this our Realme any goods or wares liable to the paiment of the said custome & subsidie or poundage, which either be omitted out of this booke, or be not now

now vſed to be brought in, or caried forth, our pleaſure is that in ſuch caſe euery our Cuſtomer or Collectour for the time being ſhall leuy the ſaid cuſtomes and ſubſidie or poundage according to the valure and price of ſuch goods to be affirmed vpon the othe of the Merchant in the preſence of the Cuſtomer and Controuler for the time being, vntill further order ſhall be taken therein by vs and our Councel.

Which difference betwéen the custome of the wul and cloth considered, and the great losse sustained by vs in the same, by reason that clothing is now so much increased, it is thought conuenient by vs, with the aduice of our councell, towards the relæfe of the losse, to assesse vpon the clothes caried out by the way of Merchandise some larger rate then héeretofore hath bæn vsed.

And though it were reason to appoint such a Rate as might recompence the full of the losse sustained, yet vpon diuers considerations at this time (vs and our councell mouing) we are pleased to assesse only the rate insuing.

A true deſcription of Troy weight, and Haberdepoiz weight.

FIrſt, twelue Wheate cornes of the midſt of the eare of white Wheat, being faire, full, and dry, doo make one penny weight.

Item, lx. of thoſe pence doo make an vnce weight. And twelue of thoſe vnces make a pound of Troy weight, And a pound of Troy maketh three pound of ſiluer Coine.

But the Goldeſmiths and the Bakers doo recken xxxij. of the ſayd Wheat cornes to a penny weight, as it hath been in vſe long time ſince.

Of Haberdepoiz weight.

OF Troy weight, xiiij. vnces and a halfe and halfe quarter, doo make a pound called Haberdepoiz weight.

And by this weight men buy and ſell the moſt part of merchandize in this Realme, as Lead, Tinne, Iron, Copper, Steele, Wax, Wod, Silk, Thred, Flax, Hemp, Ropes, Tallow, and all manner of ſuch other merchandiſe.

And by the difference of this weight, being truely reduced into the weights in other Countries, a man may knowe how to make his reconing the better.
